
Recorded motion — confirm the path, turns and body tilts
A. Horizontal path — vendor odometry estimate
Start
End
Left from initial position (m)
Forward from initial position (m)
Recording time (s)
B. Translation — vendor odometry estimate
Forward
Left
Height change
Displacement (m)
Time since recording began (s)
C. Body tilt — body IMU orientation
Roll — side tilt
Pitch — forward/back tilt
Angle (degrees)
Time since recording began (s)
D. Turning — change from initial heading
Body IMU relative yaw
Vendor odometry relative yaw
Angle (degrees)
Time since recording began (s)
